**we are diamond**

**THE BIGGEST DIAMOND COATING PROVIDER**  
Announces the arrival of their  
**7th Diamond Coating Device**

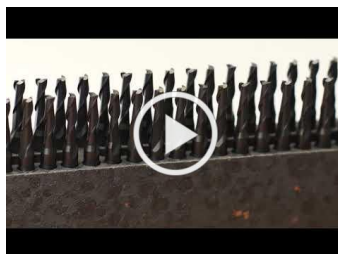

Installation of the new coating device will be completed by January 2020. Upon completion of the installation, qualification tests for the different coating layers will take place. Mass production will begin by the end of February 2020.

GCT will be celebrating their 17th year in 2020. Since 2016 GCT has invested over 1.4 million Euro in several devices for optimized process control. Their continued investments have allowed for continuous growth as well as annual volume exceeding over 1.2 million pieces.

Diamond Coated Tools offer many advantages. They have provided new machining options with cost savings. Our diamond coated tools are increasingly being used to successfully machine across a growing range of materials and industries.

GCT offers drills (as small as .010"), routers, single and two flute end mills (as small as .012"), thread mills, countersinks, chamfering cutters and much more.
